

## Congratulations!

Thank you for choosing Sherwoodbase Window Bird Feeder. You will find a lot of helpful information in this guideline.

---

*"Be patient and don't give up! I guarantee this feeder will work! Just don't scare them away by noises and try not to be too excited at your first encounter!" —  
Daphne T. from California Bay Area.*

please register your birdfeeder to get the free gifts at:

<http://www.sherwoodbase.biz/freegifts>

An eBook, "How to use bird feeders for beginners," is being handed out for free to our customers. More gifts are coming in the future!

## Instructions and Tips:

### Location

Choose a window that:

- Is away from trees or anywhere that squirrels can access.
- Has clear view and the outside of which can be accessed from the inside easily.

### Features:

- 2015 Revised model comes with a newly designed tray that can make refilling and cleaning much easier! Simply unlock the hook by pulling up the tray.
- A small compartment is designed to allow you to put water, or different types of seeds for the birds (beware not to spill on another compartment of seeds!)
- This feeder's top layer is flat so you can use it as a 'test drive' area or just put some seeds on it to let the birds have fun with the 2nd floor compartment!

### **Installation:**

1. Please clean both sides of the window thoroughly before installation.
2. (Optional) Soften the suction cups before attaching them to the feeder's holding holes.
3. Moisturize the suction cups with 1 drop of water each, the point is to help strengthen the stickiness between the suction cups and the window.
4. Plan well before installing the birder feeder (should be 1/3 from the top of the window frame) and gently push the suction cups outward during installation.
5. Slightly rotate the tips of the suction cups outward to the top edge of the window when taking the cups off for cleaning.

### **Seeds:**

- Depends on the types of birds you want to attract and what kinds of birds are surrounding your area, we highly recommend black oil sunflower seed as a starter, and try not to use those mixed ones unless you know your backyard birds are not picky!

### **Be Patient, be Cautious, and be Cherished:**

- Depends on the location and season, it will take a couple days or up to a week for the birds to recognize this new playground! Once they find it, they will use it throughout the sunny days!
- Once the birds begin to use the feeder, please keep a good habitant for them by cleaning the feeder (with few drops of mild detergent only) and refilling the tray regularly.
- Kids, pets or even grandparents should all benefit to this new entertainment! These beautiful, lovely creatures are here to show you that we should always cherish the nature.
